Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 87 is objected to because of the following informalities: claim 87 is redundant because it contains only limitations already cited in the independent claim it depends from. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,4-7,10-13, 16-24,74,75,77-92 are rejected under 35 U.S.C. 102(b) as being anticipated by Lopez (US 5,700,248).

Lopez teaches a medical valve comprising a housing (10) having an inlet (at 95) and an outlet (at 28, bottom of the housing) having a passageway (Fig 10), a plug member (94,36a, 98, see Fig 9) movably disposed within the passageway; a substantially flexible, resilient gland member (95) which supports the seal member, which has a seal section (proximal face) aligned with the inlet face (97, see Fig 10) such that the seal section is swabbable. The plug member occludes the passageway and prevents fluid flow through the valve when the valve is in the closed mode (Fig 10). At least some portions of the plug member are rigid (92).

3. Claims 37,40-42,44-47,49,63,65-67,69-73 are rejected under 35 U.S.C. 102(b) as being anticipated by Collinson et al (US 5,439,451).

Collinson teaches a housing with inlet end (12), outlet end (14), plug (32), gland (30) wherein the gland normally occludes the opening (94) of the plug (via 56).

Allowable Subject Matter

4. Claims 38,43,64 and 68 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection. Regarding Collinson, applicant had previously argued that the plug was not a cannula that directs fluid through the valve. This limitation is found in claims 38,43,64, and 68, but in claims 37 or 63.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 9:00-5:30 M-F.
